NANYANG TECHNOLOGICAL UNIVERSITY SINGAPORE

Admission to Undergraduate Courses (Full-Time)

Application Form

Personal Statement

In not more than 300 words, what motivates you to want to join the Renaissance Engineering Programme.
Engineering is the result of and results in innovation. This idea was greatly reinforced growing up with an engineer in the house and observing him in action. Listening to my dad's stories about work, anyone would think knowing the art and science of how things around us work opens up endless possibilities to improve and customise future products. Additionally, through him, I have been exposed to both the practical and management side of engineering which has shaped my interest to pursue a career that is able to merge both. REP will be a great fit for me as I will be able to explore both engineering science & technology management.

I represented my school in Engineering Challenge 2019, STEM workshop 2019 & Young Technopreneurs for a sustainable 2030 challenge hackathon 2019 which pushed me to explore and widen my knowledge whilst reinforcing my interest in engineering. REP is multidisciplinary and I am keen on being immersed in such a wholistic education.

The exchange programme with REP's overseas partner universities also drew me to the course. This opportunity would allow me to deepen my understanding of other cultures, how other nations prioritise new developments, enrich me with knowledge and new experiences. The exposure to cross-disciplinary collaboration, problem-based experiential learning which are highly relevant will give me a competitive advantage in my educational and professional world. The professional attachment will help me deepen my knowledge about business world and gain work experience that is invaluable.

I believe future engineers need wider educational and professional perspectives to be a more global professional with a holistic approach able to work in different disciplines to face new complex problems in the future to build a sustainable planet. REP would be the right choice for me to be shaped into an all-rounded engineer.

Reference Report

Your application requires one reference in the format of **online reference report** to be completed by **one referee**. Instructions for your referee with regard to completing the online reference report are available at '**Tracking Page**' which you will be directed to after completing and submitting this online application form.
